PROFESSIONAL SUMMARY

Product-focused Software Engineer with a proven track record of building and scaling real-world applications. Co-founder of a 100K+ user multi-vendor e-commerce platform with revenue and App Store / Google Play releases. Currently Web Developer & Project Manager at LabNeighbour. Specialized in Flutter/Dart, React, TypeScript, and Firebase, delivering cross-platform solutions (iOS, Android, Web) with end-to-end ownership including architecture, performance optimization, and deployment.

EXPERIENCE

Web Developer & Project Manager — LabNeighbour

2025 – Present

- Developed and launched the LabNeighbour website end to end — frontend, deployment, and ongoing iterations
- Manage the project as Project Manager: planning, prioritization, and stakeholder coordination
- Own both the technical delivery and the product roadmap

Software Engineer (Freelance)

Remote — Vancouver, BC | Nov 2022 – Present

- Deliver end-to-end web and mobile solutions covering frontend, Firebase backend, authentication, and deployment
- Built Chattang, a real-time multilingual messaging system with React and Firebase; owned frontend, real-time sync, and authentication
- Developed a real-time gym membership and access-tracking system, improving daily operations
- Develop responsive web frontends with React, HTML, and CSS
- Shipped client websites, a custom TradingView trend-detection indicator, and a 2D Unity platform game

Co-Founder & Flutter Developer — Bi-Siparis

Multi-Vendor E-Commerce Platform | Mar 2021 – Oct 2022

- Co-founded and scaled a multi-vendor e-commerce platform to **100K+ users with revenue**
- Led Flutter architecture and development across iOS, Android, and Web
- Owned the full product lifecycle in a 3-person startup; launched on App Store and Google Play
- Exited by transferring equity before relocating to Canada

TECHNICAL SKILLS

Languages: Dart, TypeScript, JavaScript, Python, C#, SQL, HTML, CSS

Mobile: Flutter, iOS & Android releases, State Management, Performance Optimization

Frontend: React, Next.js, Responsive UI

Backend & Data: Firebase (Auth, Firestore), REST APIs, Real-time sync, MySQL

DevOps & Practices: Git, CI/CD, Project Management, Logging & Analytics, Unity, Linux

EDUCATION

Full-Stack Web Development — CCTB, Canadian College of Technology and Business

Vancouver, BC | In Progress, Expected 2027

B.S. Software Engineering — Near East University

Graduated Jan 2023
